# Almería, Alborán Golf Course

El Toyo, Retamar

AYUNTAMIENTO DE ALMERÍA

## SPECTACULAR GOLF COURSE

Close to the provincial capital, in the modern residential and tourist resort of El Toyo, just a few metres from the beach and next to Cabo de Gata Natural Park. It is located in a unique semi-desert environment. Technically speaking, this is one of the most modern golf courses in Europe.

Designed by the prestigious golf architect **José Ramón Espinosa**, and managed by **Almería Town Hall**, it is an 18 hole championship golf course with a par of 72 and is 6,278 metres in length. It has a large practice area and various training zones.

The designer has achieved an important balance between the lay out of the different holes as well as the length. The orientation and situation of the various elements that make up the

course (bunkers, streams, lakes, etc.), enable you to enjoy golf on a challenging course that is capable of testing everybody. The 66 bunkers are strategically positioned along each and every one of the holes, keeping the player's attention focused on the course at all times.

It was the headquarters of the **Mediterranean Games (Almería, 2005)**, in which the Spanish team won many medals.

## THE GOLF ACADEMY

One of the main attractions of **Alborán Golf** is without doubt, its Academy and its firm commitment to education as a basis to train new players.

**Alborán Golf** carries out induction courses for all ages throughout the year at affordable prices for all budgets. Collective eight-hour courses with great flexible hours are offered; and throughout these eight lessons, students learn how to handle of the different golf clubs and hits on the Alborán Golf practice range, the largest of the province of Almería, and in its different training areas.

Also there are advanced training courses for players who are already in possession of their Golf Federation licence and have already begun to go out to the field or want to improve their performance through more advanced lessons or

kinds of play in the tour.

**Alborán Golf** has a golf academy for children, with an average of thirty students per course. Lessons take place at the weekends, so kids from 6 years old on can gradually take up this sport. Children are divided into groups according to their age and level of play and the specific methodology followed makes lessons fun and not just "a school-like subject" to pass.
